

Below you will find information about the latest information about the vaccination process for Covid 19.

- 1. Call your Primary Care Physician to see if they have ordered vaccine and if you are eligible to receive it from them.**
- 2. Check the DSHS website to see if there is a location near you and call to verify. Most places are not doing walk-in Covid -19 vaccinations. You may be put on a waiting list.**

Who's getting the vaccine now?

If you are a front-line healthcare worker or resident of a long-term care facility, you are eligible now to receive the vaccine, since December 14. This group is considered [Phase 1A](#).

If you are in [Phase 1B](#), you are also eligible to get the COVID-19 vaccine, depending on availability and the vaccine provider. Vaccine supply remains limited, but more vaccine will be delivered to providers each week. Phase 1B recipients include:

- People 65 years of age and older
- People 16 years of age and older with at least one chronic medical condition that puts them at increased risk for severe illness from the virus that causes COVID-19, such as but not limited to:
 - Cancer
 - Chronic kidney disease
 - COPD (chronic obstructive pulmonary disease)
 - Heart conditions, such as heart failure, coronary artery disease or cardiomyopathies
 - Solid organ transplantation
 - Obesity and severe obesity (body mass index of 30 kg/m² or higher)
 - Pregnancy
 - Sickle cell disease
 - Type 2 diabetes mellitus

If you are in Phase 1A or 1B, please visit the [Texas COVID-19 Vaccine Provider Locations map](#) to see if and where you might be able to get a vaccine today.

Remember, your ability to get a vaccine today or this week will depend on vaccine availability at your provider's office, clinic, or facility. Please call ahead to your provider.
